PROFESSIONAL SUMMARY

Senior Software Engineer & Full Stack Developer with 7+ years of experience engineering scalable web architectures, RESTful APIs, microservices, ERP integrations (Odoo 18/19), and legacy system modernizations for multinational enterprises (Danone Europe, Falabella Financiero), financial mutual organizations, and the agribusiness sector.

Specialized in end-to-end development using FastAPI, Next.js, React, Node.js, Python, Laravel, and Angular. Proven expertise in migrating legacy systems to cloud-native stacks, designing ETL data pipelines, and automating workflows with AI-assisted tooling. Higher education teaching experience in Software Engineering and Operating Systems.

TECHNICAL SKILLS

- **Frontend:** Next.js (App Router), React, Angular, Tailwind CSS, GSAP, Framer Motion, HTML5/CSS3, JavaScript (ES6+).
- **Backend & Frameworks:** Python (FastAPI, Django), PHP (Laravel, Yii, CodeIgniter), Node.js, Ruby, Odoo (18/19 Community), Payload CMS (v3).
- **Bases de Datos & ETL:** PostgreSQL, MySQL, MongoDB / Atlas, SQLite, FoxPro / DBF, Redis.
- **Cloud & DevOps:** Docker, Docker Compose, AWS (Lambda, S3), DigitalOcean, Linux (Ubuntu/Debian), Auth0, CI/CD, Self-Hosting / VPS.
- **Metodologías & IA:** IA Multi-Agente (Antigravity, Claude Code), IIoT (MQTT/REST), Web Scraping (Puppeteer, Selenium), Agile / Scrum.

EXPERIENCIA LABORAL

1. Senior Full Stack Developer | Mutual Aprepa

September 2025 – Present

- **Legacy Core Modernization:** Architected and led the migration of a 30+ year mission-critical FoxPro core system to a modern, decoupled, and scalable architecture based on FastAPI (Python) and Next.js (React), applying Agile methodologies to map and document complex business logic.
- **Aprepa Connect Platform Evolution:** Maintained and scaled the member services application built with Angular and Ruby, integrating federated authentication via Auth0.
- **Data Pipelines (ETL):** Built automated Python ETL sync pipelines to extract and transform legacy DBF/SQLite records into MongoDB Atlas hosted on DigitalOcean infrastructure.

2. Full Stack Tech Lead & ERP / IoT Consultant | Cooperativa Tera / Corporate Projects

October 2023 – Present

- Odoo 18 & 19 Community ERP Implementation: Architected and deployed containerized Odoo solutions (v18 and v19 Community) on Linux servers using Docker Compose for the manufacturing and cooperative sectors; integrated Argentine fiscal localization modules and engineered custom business modules (hms_meters_base).
- Web Development & Multi-Agent AI: Spearheaded technical execution for corporate digital platforms using Next.js, React, Tailwind CSS, and Laravel / Payload CMS v3 (Agrointegral, ECC, Hermetal), streamlining development cycles through AI-assisted orchestration.
- IIoT Telemetry Platform (TeraSync 4.0): Engineered real-time industrial telemetry ingestion and monitoring from PLCs via Adafruit IO (MQTT/REST), powered by a Laravel backend and an interactive React frontend.

3. Full Stack Developer (Multi-Region APIs) | Danone Europe (via Tera / Devecoop)

April 2023 – February 2025

- RESTful API Architecture: Designed and deployed containerized REST APIs in Laravel and Docker to enable cross-border data integration and synchronization across 7 European countries (United Kingdom, Spain, Portugal, Germany, Poland, Belgium, and France).
- Data Optimization & Enterprise Security: Tuned high-impact SQL queries for large data volumes, integrated enterprise authentication with Gigya (SAP Customer Data Cloud), and automated scheduled reporting workflows under Scrum.
- Multi-Cloud Infrastructure: Managed deployments, provisioning, and maintenance across DigitalOcean, Hostinger, and on-premises VPS environments.

4. Full Stack Developer – Backend & Cloud Specialist | Falabella Financiero / Estratégica / Molino Indelma

April 2021 – Present

- Falabella Financiero (Room23): Built backend features in PHP and refactored legacy components to boost performance, reduce latency, and scale MySQL and JavaScript layers.
- Estratégica (Web Scraping & Serverless): Engineered high-throughput data extraction pipelines using Node.js (Puppeteer) and PHP, integrated into serverless cloud architectures with AWS Lambda and Amazon S3.
- Molino Indelma (2021–2022): Developed an internal operations platform in Python / Django for automated pay slip distribution and managerial reporting.

FEATURED PROJECTS

- Odoo 18/19 ERP Infrastructure & Docker Compose
- Containerized production environments for Odoo and PostgreSQL with automated deployment pipelines via Shell Scripting, featuring full Argentine fiscal localization integrations (ADHOC, OCA). github.com/acostamatt/odoo-docker

TEACHING & ACADEMIC EXPERIENCE

Higher Education Lecturer in Software Development | Instituto Superior Particular N° 4038 "Juan Pablo II"

May 2021 – Present | Roldán, Santa Fe, Argentina

- Professor in charge of Operating Systems, Software Engineering I, and Software Engineering II within the Higher Technical Degree in Software Development curriculum.
